

BHAR DAYCEM

Software Engineer | Full-Stack & Mobile Developer

📍 Menzel Hor, Nabeul, Tunisia ✉ daycembhar3@gmail.com ☎ +216 46 554 351 in daycem-bhar 🌐 Daycembhar2

Profile

Software Engineer with hands-on experience in full-stack and mobile application development. Skilled in designing and delivering scalable software solutions using Flutter, Angular, Spring Boot, FastAPI, and SQL databases. Passionate about building reliable products and continuously improving technical expertise.

Education

- **2023 – 2026 : B.Sc. in Computer Science, Software Engineering** Institut Supérieur d'Informatique de Médenin
- **2022 – 2023 :Baccalaureate in Mathematics** Lycée Taïeb Mhiri, Menzel Temime

Skills

Programming Languages: Java , C# , C++ , JavaScript , PHP , Python, Dart

Databases : MySQL , SQL , SQLServer , SQLite , MongoDB

Frontend and Backend : Flutter , VueJS , Ionic , Angular , Spring Boot, FastAPI, PHP REST APIs

Tools : VSCode , Android Studio , Eclipse , NetBeans , GitHub , Git, Postman

Modeling and Methods : UML, Merise, SDLC, Agile, Manual Testing, Bug Reporting

Projects

InternMatch — Internship & Job Recommendation Platform

- Designed and developed a full-stack platform with role-based dashboards, AI-powered CV analysis, job recommendations, and internship workflow management.

Smart Terre — Agricultural Parcel Management App

- Built a mobile app with geolocation, farmer search, parcel visualization, parcel editing, local storage, and online/offline synchronization.

Student Absence Management System

- Created a desktop application for managing student absences with CRUD operations, date/class filtering, and a normalized MySQL database.

Professional Experience

Full-Stack Developer Intern — Vibracom - 2026

- Built a multi-role internship and job platform for students, companies, and university staff using Angular, Spring Boot, MySQL, Python, and FastAPI.
- Developed job search, application management, internship validation, CV analysis, and student task-tracking modules.
- Implemented an AI-assisted recommendation engine to match candidates with relevant internship and job opportunities.
- Conducted manual testing cycles to detect, document, and resolve bugs across application modules.

Mobile Developer Intern — Ezzayra Solutions - 2025

- Developed **Smart Terre**, a cross-platform mobile application for agricultural agents to manage farmers, parcels, and geolocation-based agricultural data.
- Implemented offline-first features using Flutter and SQLite, enabling field agents to work reliably in low-connectivity environments.
- Integrated PHP APIs and SQL Server database operations for online synchronization and data management.
- Produced UML documentation and performed manual testing, bug tracking, and functional validation before delivery.

Certifications

- Angular Development Certification — Designet Center (2026)
- Spring Boot Development Certification — Designet Center (2026)
- Communication Skills Workshop Certification (2026)
- Hackathon Participation Certificate (2026)
